

ON JULY 9, 2019, SUPPORT FOR SQL SERVER 2008 AND 2008 R2 WILL END.

That means the end of regular security updates.

Don't let your infrastructure and applications go unprotected.

As an AWS Partner Network (APN) Premier Consulting Partner, and holder of the Microsoft Workloads Competency, Six Nines can help **identify at-risk applications** and **develop a remediation plan**. The end of SQL Server 2008 compels enterprises to consider options for deploying and managing databases, creating the ideal opportunity to discuss how to migrate and run your SQL databases on AWS.

SIX NINES' SQL SERVER 2008 RISK ASSESSMENT INCLUDES:

- A half-day Risk Assessment Workshop
- An inventory of your applications
- 30 day access to AWS Partner Network (APN) Partner assessment tools

AS PART OF THE ASSESSMENT, YOU WILL:

- Better quantify your risk by identifying your applications using SQL Server 2008
- Explore risk remediation strategies
- Receive an inventory of your Windows (and Linux) applications
- Receive an on-premises vs. AWS cost comparison
